

RM-10868 W7HUY

The previous attempt was unsuccessful. I shall retry.

I wish to comment on favor of Petition RM-10868 for the following reasons:

1. It does propose to establish a three class license system by-
 - a) establishing the Technician class as the entry level license class.
 - b) moves (upgrade) current Novice class licenses to the Technician class
 - c) retains the General class license
 - D) combines the Advance class license with the Extra Class license
2. It suggests retention of Element 1, morse telegraphy for both the General and Extra class licenses.
3. it provides a revised HF spectrum bandplan for ITU region II.
